

Horse racing is the third most popular sport to bet on in Malaysia, which is quite easy to play with online sportsbooks.

As horse racing takes place all over the world, you can place bets on any of the 24 hours a day. Somewhere in the world there is horse racing. It's similar to what happens with football and tennis, two other popular sports around the world.

There are so many things to consider when you place bets on horse racing:

### Horse

The horse is a main star of the bet, the horse is a sensitive animal, and your winning can be affected by many stressors much like a human athlete in an individual sport.

The type of soil, the type of race, course, jockey, food, any ailments or illnesses, everything must be taken into account when betting on the horse. For this, when betting on horse races, it is very important to choose a racetrack that gives the most information about the animal's history, such as its performance on that ground, at that distance, with the jockey who will ride it, about his trainers and horse farms.

### Jockey

An exceptional jockey can be the differential that leads a reasonable horse to beat a big favorite who is led by a jockey who is not in the best of his life or who is only reasonable. It is the jockey who implements the strategy defined by the horse staff for each match. And he is responsible for changing it if there is a problem.

Another factor that can interfere with a horse's performance, no matter how good, is the change of jockey. Until the pair getting along perfectly, communication issues between the two should first affect results.

### The Type of Racetrack

The comparison with tennis can be made here. Just as some tennis players play better on clay and are terrible on grass, some horses suffer on very wet ground, while others do better on long runs or obstacles.

Turf has races on natural or artificial terrain, with or without obstacles and there are different types of obstacles, over short or long distances.

Citibet is one of the greatest online racebooks in Malaysia. It doesn't cover all sports well, but horse racing is their focus.
